

# THE STAMP READING INFORMATION PROCESSING ENTERPRISE SYSTEM

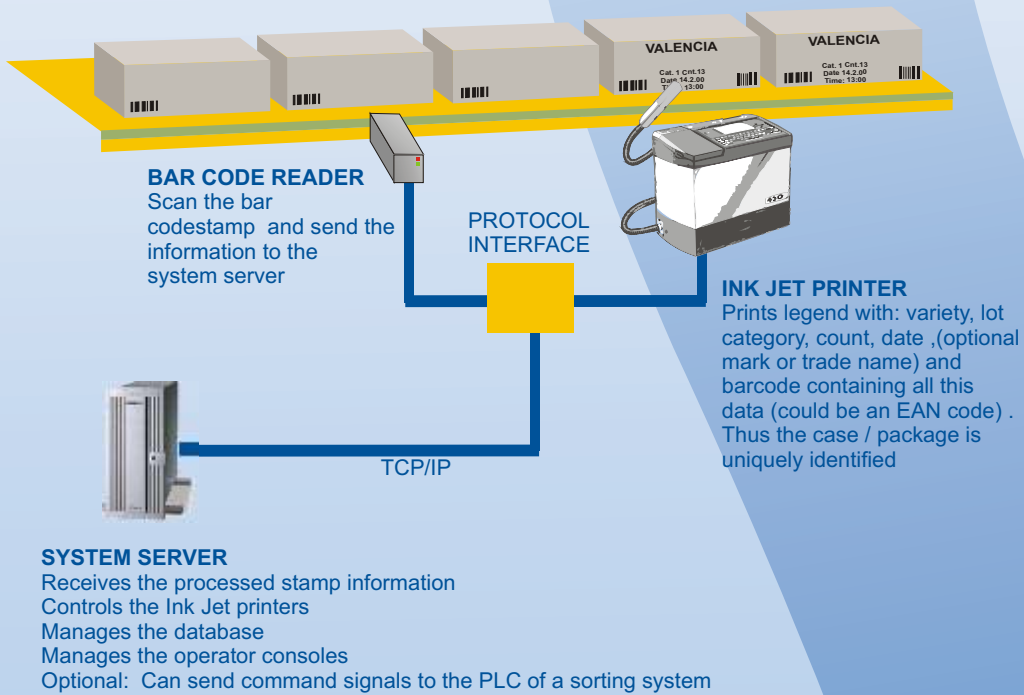

- Identifies each carton's content and packing clerk.
- Prints variable information in line on each carton such as lot number, variety, size, quality, brand, customer, packing date, expiration date, weight and product identification barcode.
- Registers the packing clerk ID and his yield.
- Information is stored in its data base allowing stock control of product and consumables, yield information and traceability by each variable that the system processes.
